

AI MONEY-LEAK KIT • RESOURCE 2 OF 4

The Kill–Your–Tool– Sprawl Audit Template

Fill it in. See the monthly bleed at the bottom. Most owners find a few hundred to a couple thousand a month they're paying for and not using.

Adova Synapse

Fractional AI Officer for Atlanta mid-market companies. Free Kit, no card, no pitch to download it.

The Kill-Your-Tool-Sprawl Audit Template

The number one pain I see in mid-market companies: you bought a pile of tools, and nobody runs half of them. This template makes the bleed visible. Fill in every tool, AI subscription, and automation you pay for. One row each. Be honest in the last two columns, that's where the money is.

This is also the exact grid the **AI Sprawl Teardown** runs against. Fill it out here, and the paid Teardown does the heavy analysis on it for you.

How to fill it in

- 1. **Tool name + monthly cost.** List everything, even the small ten-dollar ones. They add up.
- 2. **What it's supposed to do.** One line. If you can't say, that's a flag.
- 3. **Who actually uses it.** A name, or "nobody," or "not sure." "Not sure" is itself the finding.
- 4. **Last time it produced a result.** A real outcome, not "we have it." If the answer is "I can't remember," circle it.
- 5. **Keep / Cut / Consolidate.** Your gut call. Keep = earns its spot. Cut = gone this week. Consolidate = another tool already does this.

Your tool audit

Tool name	Monthly cost	What it's supposed to do	Who actually uses it	Last time it produced a result	Keep / Cut / Consolidate
tool name	\$ / mo	what it's for	who uses it	last result	keep / cut / consolidate
tool name	\$ / mo	what it's for	who uses it	last result	keep / cut / consolidate
tool name	\$ / mo	what it's for	who uses it	last result	keep / cut / consolidate

Tool name	Monthly cost	What it's supposed to do	Who actually uses it	Last time it produced a result	Keep / Cut / Consolidate
tool name	\$ / mo	what it's for	who uses it	last result	keep / cut / consolidate
tool name	\$ / mo	what it's for	who uses it	last result	keep / cut / consolidate
tool name	\$ / mo	what it's for	who uses it	last result	keep / cut / consolidate
tool name	\$ / mo	what it's for	who uses it	last result	keep / cut / consolidate
tool name	\$ / mo	what it's for	who uses it	last result	keep / cut / consolidate
tool name	\$ / mo	what it's for	who uses it	last result	keep / cut / consolidate
tool name	\$ / mo	what it's for	who uses it	last result	keep / cut / consolidate
tool name	\$ / mo	what it's for	who uses it	last result	keep / cut / consolidate
tool name	\$ / mo	what it's for	who uses it	last result	keep / cut / consolidate
tool name	\$ / mo	what it's for	who uses it	last result	keep / cut / consolidate
tool name	\$ / mo	what it's for	who uses it	last result	keep / cut / consolidate
MONTHLY TOTAL	\$ -----	add every row above, this is your real monthly software bill			

The consolidation map (common overlaps)

Most owners are paying for three things that could be one. Here's where overlap usually hides. Mark any cluster where you've got two or more.

Cluster	Tools that often overlap	What it usually collapses to
☐	Separate chatbot, helpdesk, and FAQ tools	one support layer
☐	Standalone scheduler, CRM calendar, and reminder app	one CRM with booking
☐	Multiple AI writing or content seats across people	one or two shared seats
☐	Email tool, SMS tool, and automation tool bought separately	one automation platform
☐	Project tool, docs tool, and a separate SOP tool	one workspace
☐	Two analytics or reporting dashboards nobody fully trusts	one source of truth

What owners typically find

When owners actually total the bottom row, **most find about \$300 to \$2,000 a month** they're paying for and not using. That's a typical range across the companies I look at, not a promise, your number is whatever your grid says. The point is simple: you can't cut what you can't see. Now you can see it.

Your three-question gut check before you cancel anything:

- If this tool vanished tomorrow, would anyone notice within a week?
- Is there another line on this sheet that already does this job?
- Am I keeping it out of habit, or because it earns its cost?

One more thing.

Filled it out and the total stung? That's normal. The AI Sprawl Teardown takes this exact grid and does the deep cut-and-consolidate analysis for you, with the real savings math. Or start with a free Scope Call and we walk it together.

Run the AI Sprawl Teardown on this grid, or book a free Scope Call →

No card, no pressure. If there's nothing worth fixing, I'll tell you straight.
